

May 23, 2024

Dear Member of Congress:

On behalf of our millions of members and supporters nationwide, **we write to you in support of the End Polluter Welfare Act.** This legislation would rein in the corporate power of the polluting fossil fuel industry, lower climate emissions, reduce related harm in frontline communities, and raise \$170 billion in revenue over the next ten years.

The End Polluter Welfare Act is the most comprehensive legislative proposal to address the billions in special interest subsidies that disproportionately flow to the oil, gas, and coal industries. These subsidies include century-old tax loopholes, giveaway leasing rules for extraction on our public lands and waters, and newer investments of billions into false solutions that keep fossil fuel projects alive for decades longer through investments from export credit and development finance agencies.

We must end the \$170 billion in taxpayer subsidies for the fossil fuel industry. With major provisions of the Tax Cuts and Jobs Act of 2017 expiring in 2025, there is an opportunity to pass critical tax reform legislation and ensure that fossil fuel corporations finally pay their fair share. The End Polluter Welfare Act can advance accountability for the fossil fuel industry, key climate and public health priorities, while raising revenue for much needed investments in a more just and resilient society.

Sincerely,
